

Do I Need Home Health Questionnaire?

If you answer **yes** to any of these questions about yourself or someone you know, talk to your doctor and call us! We can help you in making the best choice for your home care needs.

- Have you recently been discharged from a hospital, rehabilitation center or nursing home?
- Or you planning a hospital stay for a scheduled surgery like a knee or hip replacement or gall bladder removal or other surgery?
- Do you have health problems such as diabetes, heart or lung conditions, cancer or stroke?
- Do you have difficulty taking a bath or getting around?
- Do you see a doctor frequently?
- Do you take several medications?
- Are you confused about how to take your medications?
- Have you changed or added new medications lately, including needing injections like B12 or insulin?
- Do your feet swell?
- Do you get short of breath with little activity?
- Do you have trouble walking or leaving home?
- Do you have frequent hospitalizations or go to the emergency room often?
- Have you or a loved one been diagnosed with a terminal illness?
- Do you have sight loss?
- Do you have chronic pain?
- Do you have memory loss? Or been diagnosed with Alzheimer's or dementia?
- Have you been diagnosed with a new medical problem?
- Do you have wounds, tubes, drains or special treatments that require care?
- Are you experiencing depression, anxiety or any behavioral health concerns?
- Do you need rehabilitation therapy (ike physical therapy, occupational therapy or speech therapy)
- Do you need special equipment, have home safety concerns or difficulty with getting around your house?
